Al Gore knows everybody. He can whip out his cell phone and dial anyone and say anything.... This Documentary titled 'An Inconvenient Sequel : Truth to Power' and Directed by Bonni COHEN & Jon SHENK was presented at the Cannes Festival this Year and soon to be released in FRANCE on September 27, 2017 (Released in United States on July 28, 2017). This Documentary is a follow up to the 2006 Documentary, 'An Inconvenient Truth', where Former American Vice President Al Gore attempts to make us aware of the rapidly Multiplying Dangers of the Climate-change Crisis. Cameras follow him behind the scenes (in moments both private and public, funny and poignant) as he pursues his Idea that while the stakes have never been higher, the perils of Climate Change can be overcome with Human Ingenuity and Passion.

A specific attention was given by Directors Bonni Cohen and Jon Shenk to Al Gore's negotiations with India at 2015´s UN Climate Change Conference. This part, treated like an Intriguing Thriller, is full of high-power Deals and Clever Detours, where Al Gore emerges the hero, facilitating a Mutually Beneficial Plan for India and the Larger Global Goal. Al Gore suggests to Indian Minister Piyush Goyal to strive for 100% renewable energy while Piyush Goyal states that India will do it after 150 years, when the Per-capita Income will be equivalent to America´s and when Indians will have used up as much Coal as Americans did before realizing a need for Renewable Resources.

'An Inconvenient Sequel : Truth to Power' is s populated with Eye-opening Statistics, Al Gore at his Climate Leadership Training Sessions, Visits to Areas most affected by the Climate Crisis and when he comes off as an Alarmist owning to his Angry Outbursts.... In his First Film, he predicted Catastrophic Antarctic and Greenlandic Ice Melts and rising Sea Levels engulfing millions. Instead, Antarctic Ice has increased, Al Gore also claimed that Man-caused Global Warming would result in more Catastrophic Hurricanes and Tornadoes. in 2006, he said that Mount Kilimanjaro would be Free of Snow on its Peak by "the end of the decade."... With this Second Documentary, let's compare what happened and what didn't come true.... At least, the Documentaries were made and allow People to make their own Idea according to their Belief and Personal Infos.
